AIM:-[A] : Traversal in the link list.

PROGRAM:

```
#include<stdio.h>
```

```
#include<stdlib.h>
```

```
struct Node{
```

```
    int data;
```

```
    struct Node * next;
```

```
};
```

```
void linkedListTraversal(struct Node *ptr)
```

```
{
```

```
    while (ptr != NULL)
```

```
    {
```

```
        printf("Element: %d\n", ptr->data);
```

```
        ptr = ptr->next;
```

```
    }
```

```
}
```

```
int main(){
```

```
    struct Node *head;
```

```
    struct Node *second;
```

```
    struct Node *third;
```

```
    struct Node *fourth;
```

```
    head = (struct Node *)malloc(sizeof(struct Node));
```

```
    second = (struct Node *)malloc(sizeof(struct Node));
```

```
third = (struct Node *)malloc(sizeof(struct Node));
fourth = (struct Node *)malloc(sizeof(struct Node));

head->data = 5;
head->next = second;

second->data = 10;
second->next = third;

third->data = 15;
third->next = fourth;

fourth->data = 25;
fourth->next = NULL;
printf("Linked list travell\n");
linkedListTraversal(head);
return 0;
}
```

[OUTPUT]

```
String > C lltravell.c > main()

```

```
        ptr = ptr->next;
```

```

    }
}

struct Node * insertAtFirst(struct Node *head, int data)
{
    struct Node * ptr = (struct Node *) malloc(sizeof(struct Node));

    ptr->data = data;

    ptr->next = head;
    return ptr;
}

```

```

int main(){
    struct Node *head;
    struct Node *second;
    struct Node *third;
    struct Node *fourth;

    head = (struct Node *)malloc(sizeof(struct Node));
    second = (struct Node *)malloc(sizeof(struct Node));
    third = (struct Node *)malloc(sizeof(struct Node));
    fourth = (struct Node *)malloc(sizeof(struct Node));

    head->data = 5;
    head->next = second;

    second->data = 10;
    second->next = third;

    third->data = 15;
    third->next = fourth;

```

```

fourth->data = 25;

fourth->next = NULL;

printf("Linked list travell\n");

linkedListTraversal(head);

head = insertAtFirst(head, 100);

printf("\nLinked list after insertion\n");

linkedListTraversal(head);

}

```

[OUTPUT]

The screenshot shows a Visual Studio Code editor with a C++ project named 'travel'. The file explorer on the left shows the project structure, including a 'String' folder containing 'a.exe', 'firsts.cpp', 'll.c', and 'llatbeg.c'. The main editor displays the source code for 'llatbeg.c', which includes the implementation of a linked list with functions for traversal and insertion. The terminal at the bottom shows the execution of the program, displaying the output of the linked list traversal and insertion operations.

```

String > C:\llatbeg.c> main()
25  int main(){
41
42      third->data = 54;
43      third->next = fourth;
44
45      fourth->data = 66;
46      fourth->next = NULL;
47      printf("Linked list travell\n");
48      linkedListTraversal(head);
49
50      head = insertAtFirst(head, 100);
51      printf("\nLinked list after insertion\n");
52      linkedListTraversal(head);
